Driver version:

32.0.101.6790

Driver date:

28-04-2025

DirectX version:

12 (FL 12.2)

Physical location:

PCI bus 0, device 2, function 0

Intel(R) Arc(TM) Graphics

Day 4(3): create a comparison table listing atleast 3 difference between air cooling & liquid cooling systems for CPUs, including factors like cost, efficiency, & maintenance.

Feature	Air cooling	Liquid cooling
Cost	Budget-Friendly: Comes pre-installed on almost all standard CPUs.	Expensive: Hybrid AIO CPU's.
Efficiency	Moderate	Superior
Maintenance	Minimal: Requires occasional	Highest: AIOs require for checking.

Day 4(4): Imagine you are building a gaming PC for streaming IPL matches & playing graphics-heavy game, choose between air cooling & liquid cooling for your CPU's, & justify your choice.

→ Stays super cool: liquid carries away heat much faster than air fans.

No game lag: keep your computer fast even during long gaming & streaming sessions.

Very quiet: No noisy fan sound on your microphone while you stream.
